

Address Validation Tool

Trackmatic Address Validation Tool (AVT) makes life easier for the driver by ensuring that delivery and pick up addresses are accurate. We offer a comprehensive location management service.

What it delivers

- Sorted and cleansed delivery addresses
- Standardised address format for adhoc and fixed locations
- Customer editing of address location

How it benefits you

- Efficient location management service by a Data Integrity Team
- Address accuracy to minimise failed deliveries
- Reduced driver frustration
- Reduced wasted kilometers, time and transportation costs
- Optimised delivery to estates, complexes, gated communities, shopping malls and farms.
- Improved fulfillment and customer service delivery
