

Fuel

Trackmatic Fuel module is a fully integrated fuel management system that monitors and tracks all fuel activity and transactions. It enables consumption control, cost analysis and process transformation

What it delivers

- Easy-to-use, feature-rich mobile application
- An accurate, dependable and comprehensive fuel and bowser management system
- Extensive reporting and analysis to reduce fraud and theft
- Seamlessly integrates into fuel management and payment providers across all leading financial institutes
- Provides greater control and management of consumption
- Provides comparable consumption insights across all vehicle types
- Provides trend analysis for cost saving
- Retains historical fuel transaction data for continuous improvement
- Centralised online administration system

How it benefits you

- Cost reduction
- Fuel savings
- Improved control and visibility in context
- Reporting and analytics to drive fuel efficiency
- Benchmark consumption based on vehicle types
