

# Gate Keeper

**Trackmatic Gatekeeper is a cloud-based, security and access control system.** It allows you to manage gate arrival and departures, track time spent on premises of all vehicles and provides reliable, verified information about the driver and vehicle to mitigate risk and minimise fraud.

## What it delivers

- Tracks arrival and departure of vehicles
- Tracks vehicle time on premises
- Notifies operators of visitors and collections
- Scans licenses to get verified information about drivers and vehicles
- Protects against fraud and inaccurate information
- Customised templates for capturing and recording data
- Stores data for insurance claims or disciplinary hearings
- Seamlessly integrates with Trackmatic Link (yard execution solution)
- Advanced notification and exception alerts
- Execution reports and analytics

## How it benefits you

- Improved security and access control
- Gate-to-gate visibility
- Increased accuracy, reliability and consistency of arrival and exit information
- Minimises collection fraud
- Improved yard flow
