

Route Builder

Trackmatic Route Builder is an advanced planning and route optimisation tool. It provides you with dynamic technology to plan optimal routes for your fleet.

What it delivers

- Dynamic drag and drop route builder function
- Produces economical and optimal route options
- Robust and intelligent route planning
- Plot and test optimal route capability function
- Full visibility of planned vs. actual route
- Plot customised delivery zones
- Execution reports and analytics

How it benefits you

- Provides optimal route plans based on customised business constraints and scenarios
- Reduces transportation costs
- Maximises efficiencies
- Improves overall vehicle utilisation
- Improves overall delivery efficiency
- Consolidated cloud based application
