

# Vortex

**Trackmatic Vortex module offers a complete end-to-end solution for your control room.** It interconnects systems, functions and processes providing full visibility and control of the entire on road execution journey.

## What it delivers

- End-to-end, feature rich control room solution
- Interactive, real-time execution dashboards for full visibility of your fleet
- Predictive insights:
  - Voice call communications and call recording
  - Audit logging
  - Historical and current data
- Interactive CRM dashboard to monitor route adherence
- Provides data around key critical touchpoints and activities across the delivery journey
- Live reporting of delivery success and failure
- Centralised and consolidated view of national operations
- Execution reports
- Insightful business analytics dashboard

## How it benefits you

- Complete end-to-end visibility of the entire delivery journey
- Full fleet management and control
- Enables collaboration and engagement across multiple stakeholders and departments
- Provides context on environmental factors impacting delivery for proactive real-time decision-making
- Enables improved planning and positioning of assets
- Manage driver behaviour and vehicle capacity and utilisation
