

# Closed Distribution Network

## Value creation across the supply chain

Trackmatic Closed Distribution Network solution enables you to better manage the demanding needs of internal customers, focusing on continuous improvement in both the outbound distribution and store receiving process. It provides consistency and predictability by closely monitoring key measures such as store turn around, fleet utilisation, frequency of service and reduction of wasted time and travel costs. It facilitates value creation across the entire supply chain process for improved control, performance management, fulfillment and supplier collaboration

## What it delivers

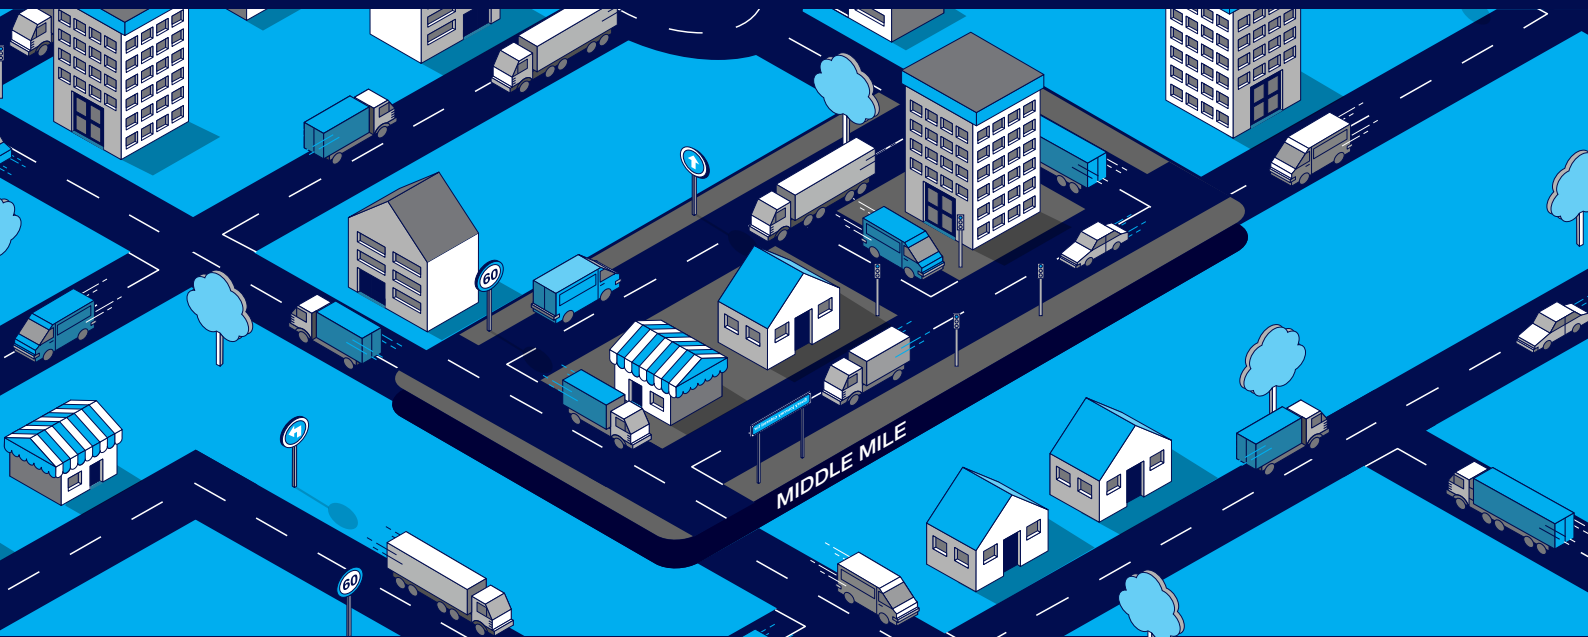

- Cloud-based mobility solution
- Easy-to-use, feature rich mobile solution
- Interactive live execution dashboards
- A complete end-to-end control room solution
- Advanced delivery notification and exception-based alerts
- Turn-by-turn navigation
- Pinpoint accurate delivery locations (geolocation)
- System recorded voice calls to customer (PBX)
- Sign-on-glass capability
- Execution reports
- Insightful business intelligence model for performance analytics

## Why it's different

- Planned vs. actual route adherence
- Seamless integration
- Real-time insights for optimal fleet resourcing and control
- Complete end-to-end visibility over the entire delivery journey
- Electronic tracking of consignments
- Optimal store receiving process
- Store notification for improved planning

## How it benefits you

- Measurable improvements in efficiencies and predictability
- Internal customer service management
- Efficiencies in store receiving process and outbound operations
- Real-time end-to-end visibility of operational efficiency
- Collaborative customer service excellence
- Improved efficiencies and fulfillment
- Reduced transportation costs
- Optimised route planning and route efficiency
- Maximised fleet utilisation
- Improved store turnaround
- Proactive decision-making
- Improved control and execution management
