

Yard Execution

Precise yard execution

Trackmatic Link is an easily integrated digital solution that delivers measurable compliance and empirical metrics that highlight yard inefficiencies in real-time. The entire gate-to-gate process is meticulously managed, monitored and controlled by handheld mobility applications. Live execution dashboards and insightful analytics models provide a deep understanding of trends relating to booking compliance and yard flow. Every aspect of Link is designed to extend visibility for yard operators, suppliers and carriers, providing real-time activity updates alongside a repository of online delivery documentation.

What it delivers

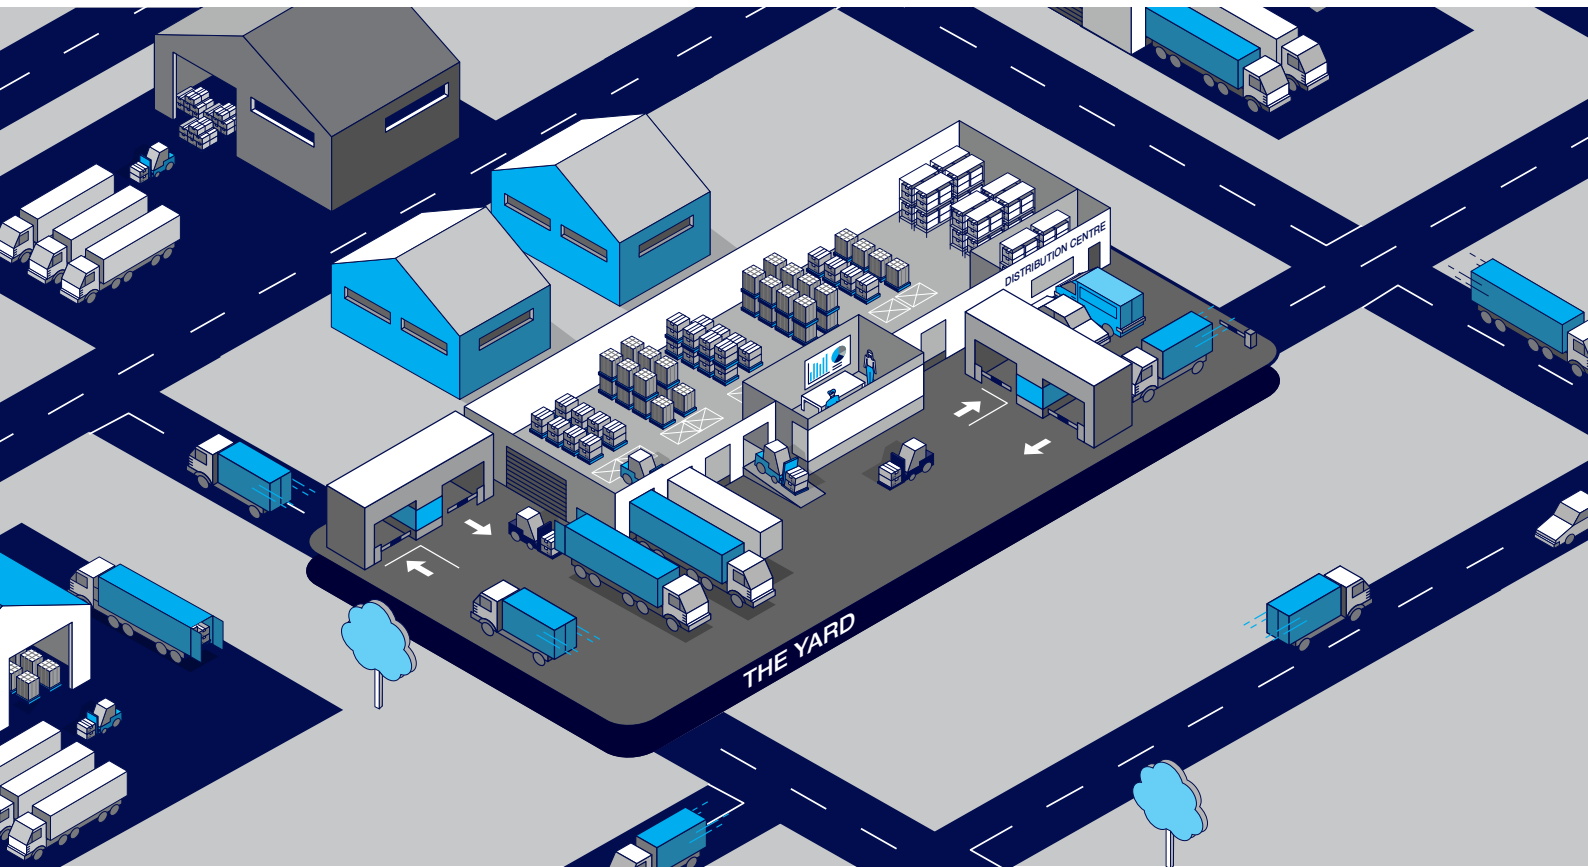

- Easy-to-use, feature rich mobile solution
- Live real-time execution dashboards
- Booking system
- Supplier Portal to view fleet activity at the yard
- Real-time activity notifications
- Supplier notifications
- Execution reports
- Insightful business intelligence dashboard

Why it's different

- Easy, quick and seamless integration
- Measurably efficient and effective
- Easy-to-use and quick to implement
- Compliant data security and confidentiality
- Live gate-to-gate and end-to-end yard visibility
- Supplier visibility of yard activity for improved service delivery
- Online POD repository

How it benefits you

- Faster truck turnaround times (loading and offloading)
- Reduced gate-to-gate times
- Improved supplier booking compliance
- Reduced overtime and costs
- Agile and reliable operational control
- Empirical data for insightful decision-making
