

# Third Party Logistics

## Removing guesswork in third party logistics

Trackmatic Third Party Logistics (3PL) solution empowers clients with full visibility of what will be delivered when and to whom, with real-time confirmation of fulfillment as it happens. The warehouse and distribution nature of 3PL solutions unavoidably distances the principals from their customers, with great expectations on the 3PL service provider to provide visibility to both parties. 3PL service providers are given optimisation and visualisation tools that enable quick and detailed what-if analysis to alleviate cumbersome administration, communication and reporting responsibilities.

## What it delivers

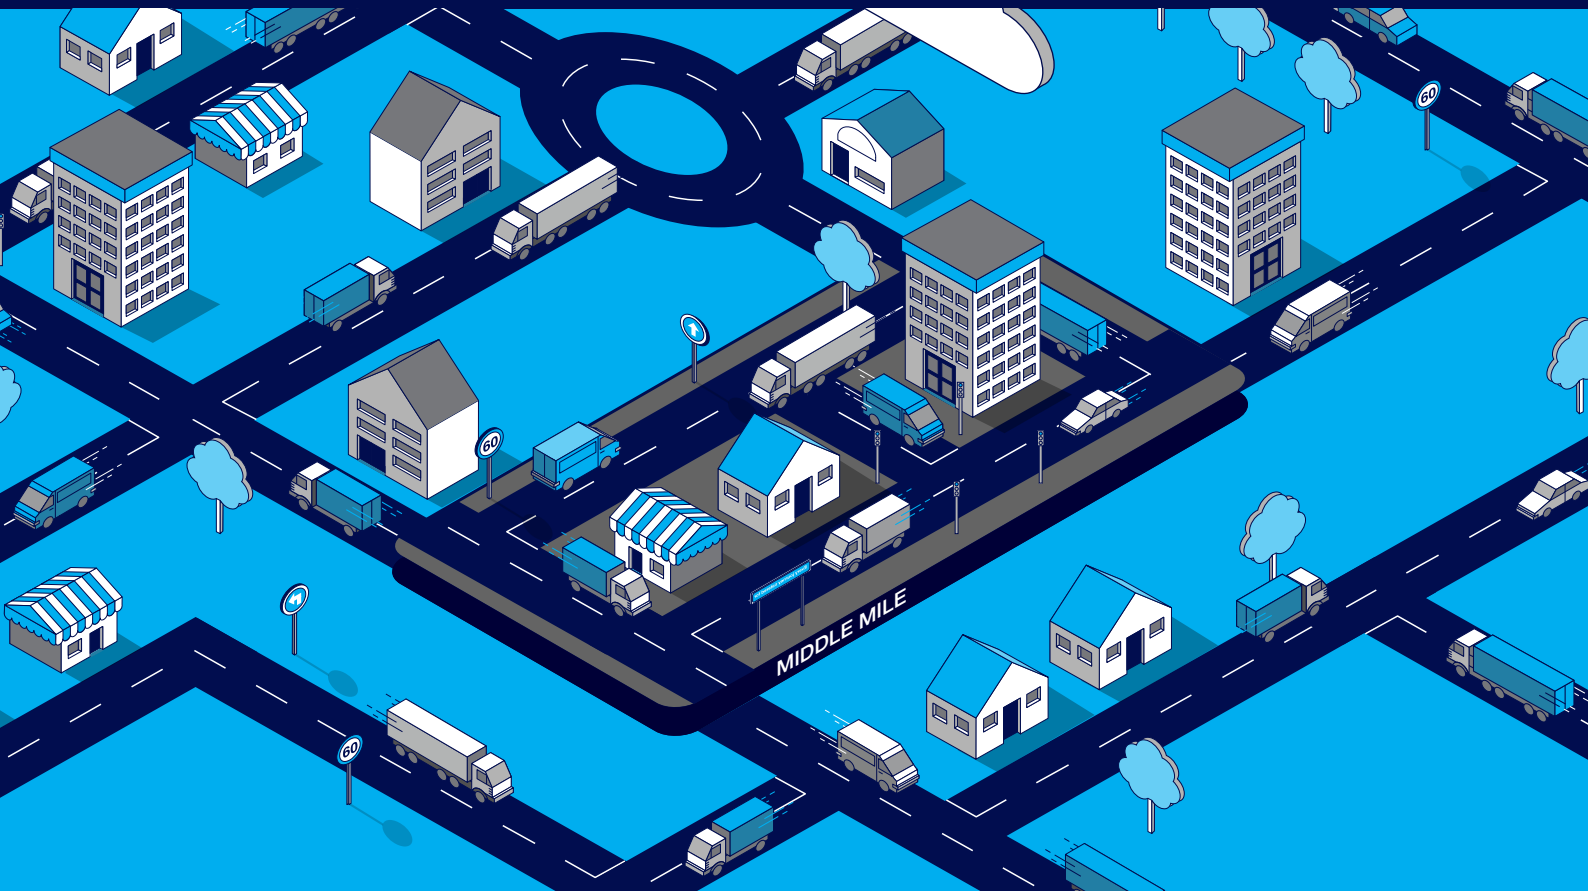

- Easy-to-use, feature-rich mobile solution
- Interactive real-time execution dashboards
- A complete end-to-end control room solution
- Advanced delivery notification and execution-based alerts
- Sign-on glass capability
- Customer rating capability
- Turn-by-turn navigation
- System recording of voice calls (PBX)
- Execution reports
- Insightful business intelligence model

## Why it's different

- Seamless integration with all ERP and WMS solutions
- Planned vs actual route adherence
- Real-time insight for proactive decision-making and problem solving
- Complete end-to-end visibility of the entire delivery journey
- Keep principals informed

## How it benefits you

- Provides end-to-end visibility of delivery performance to clients
- Provides measurable improvements in efficiencies
- Collaborative customer service excellence
- Reduced transportation costs
- Maximised fleet utilisation
